FINAL CONSULTING REPORT • STAKEHOLDER PRESENTATION

Legal Document Lifecycle: Business Analysis Findings & Future-State Recommendations

Largence LegalTech — 2-Week / 10-Working-Day Business Analysis Engagement

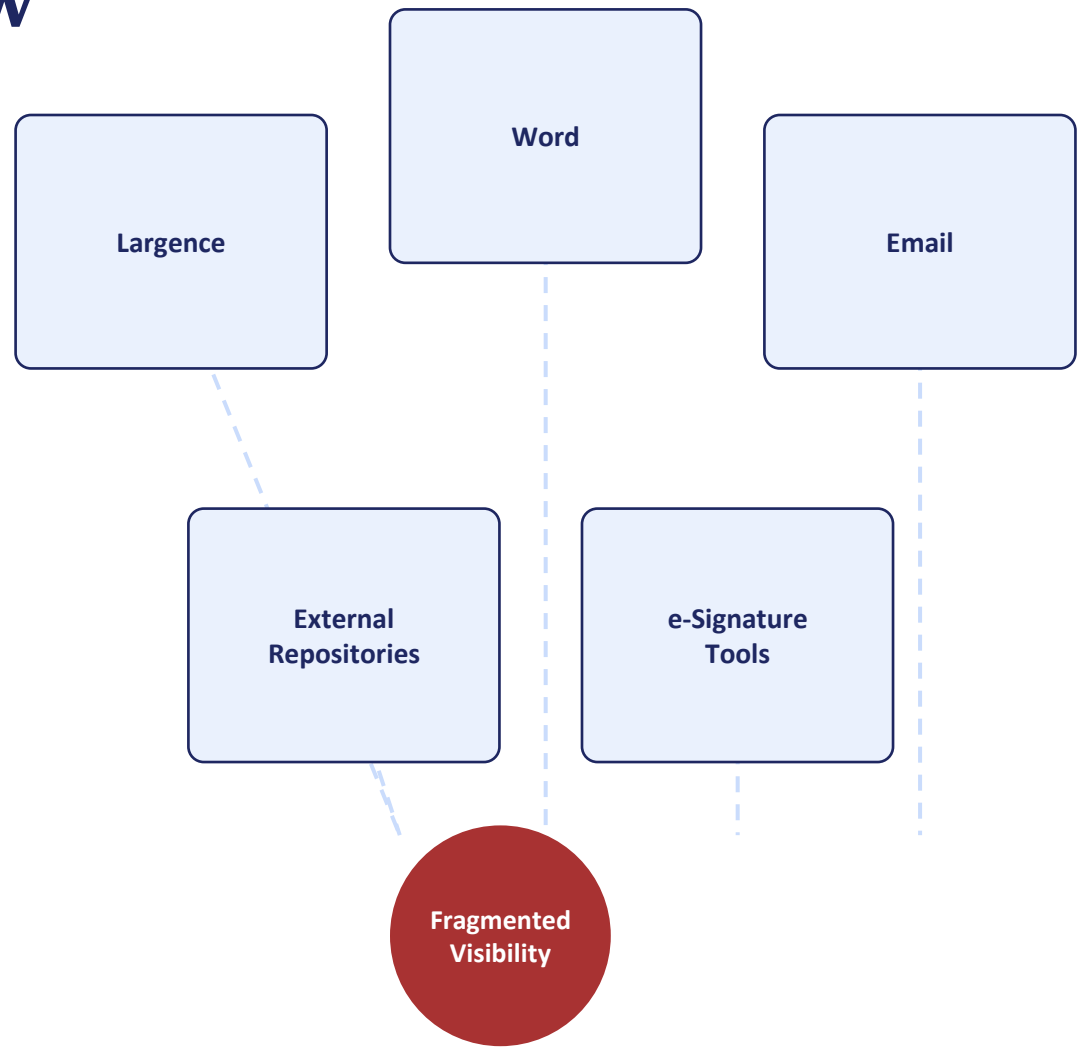

10	6	21	12
Working Days	Delivery Team (2 PM + 4 BA)	Report Sections	Priority Recommendations

CURRENT-STATE PROBLEM

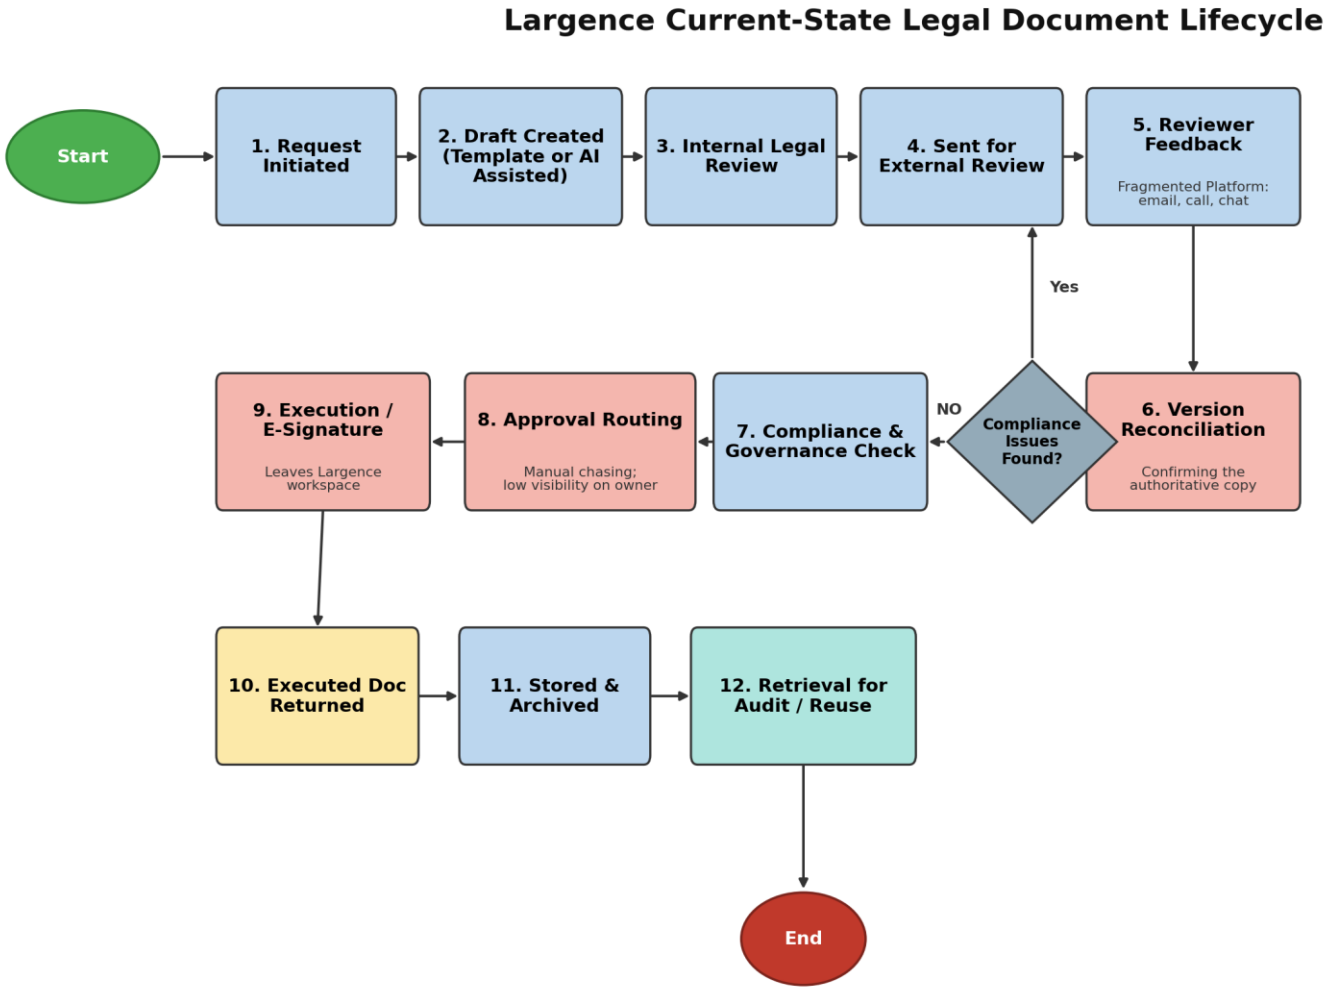

A Fragmented, Multi-Tool Workflow

Legal work moves across five disconnected environments. Each handoff loses visibility, creates duplicated coordination, and leaves the workflow history incomplete.

- **Reduced end-to-end visibility**
- **Duplicated manual coordination**
- **Incomplete workflow history**

Current-State Workflow Diagram

CURRENT-STATE FINDINGS

Where the Process Breaks

1	**Review & Approval Delays**	Handoffs and follow-up depend partly on manual coordination.	High
2	**Version Uncertainty**	Multiple edited copies can exist across channels, creating wrong-version risk.	High
3	**Approval Evidence Gaps**	Decision evidence may not always be linked to the exact approved version.	High
4	**Off-Platform Collaboration**	Material review and communication may occur outside the platform.	High
5	**Uneven Advanced-Feature Adoption**	AI, automation and reporting are not uniformly used.	Medium-High

ROOT-CAUSE SUMMARY

Six Interrelated Cause Categories

1 People

Established habits, uneven feature confidence, variable trust in AI.

2 Process

No consistently enforced end-to-end control path; repeated handoffs.

3 Technology / Integration

Need to use Word, email, signing tools or client systems.

4 Governance

Authoritative-version, approval, template and AI rules need stronger definition.

5 Data / Measurement

Some external activity is not captured; baseline metrics are incomplete.

6 External / Client

Client-required channels, counterparties and outside counsel work outside Largence.

REQUIREMENTS BASELINE

What Stakeholders Need From the Future State

1

Connected Workflow

One visible, end-to-end process with clear ownership at every stage.

2

Version Certainty

A clearly identified authoritative version and traceable version history.

3

Controlled Approvals

Approval evidence linked to the exact document version reviewed.

4

Auditability

Reviewer, decision, timestamp and condition captured for every material action.

5

Responsible AI

Qualified human review before reliance on AI-assisted legal content.

6

Reporting & Adoption

Measurable cycle time, rework, compliance and platform usage.

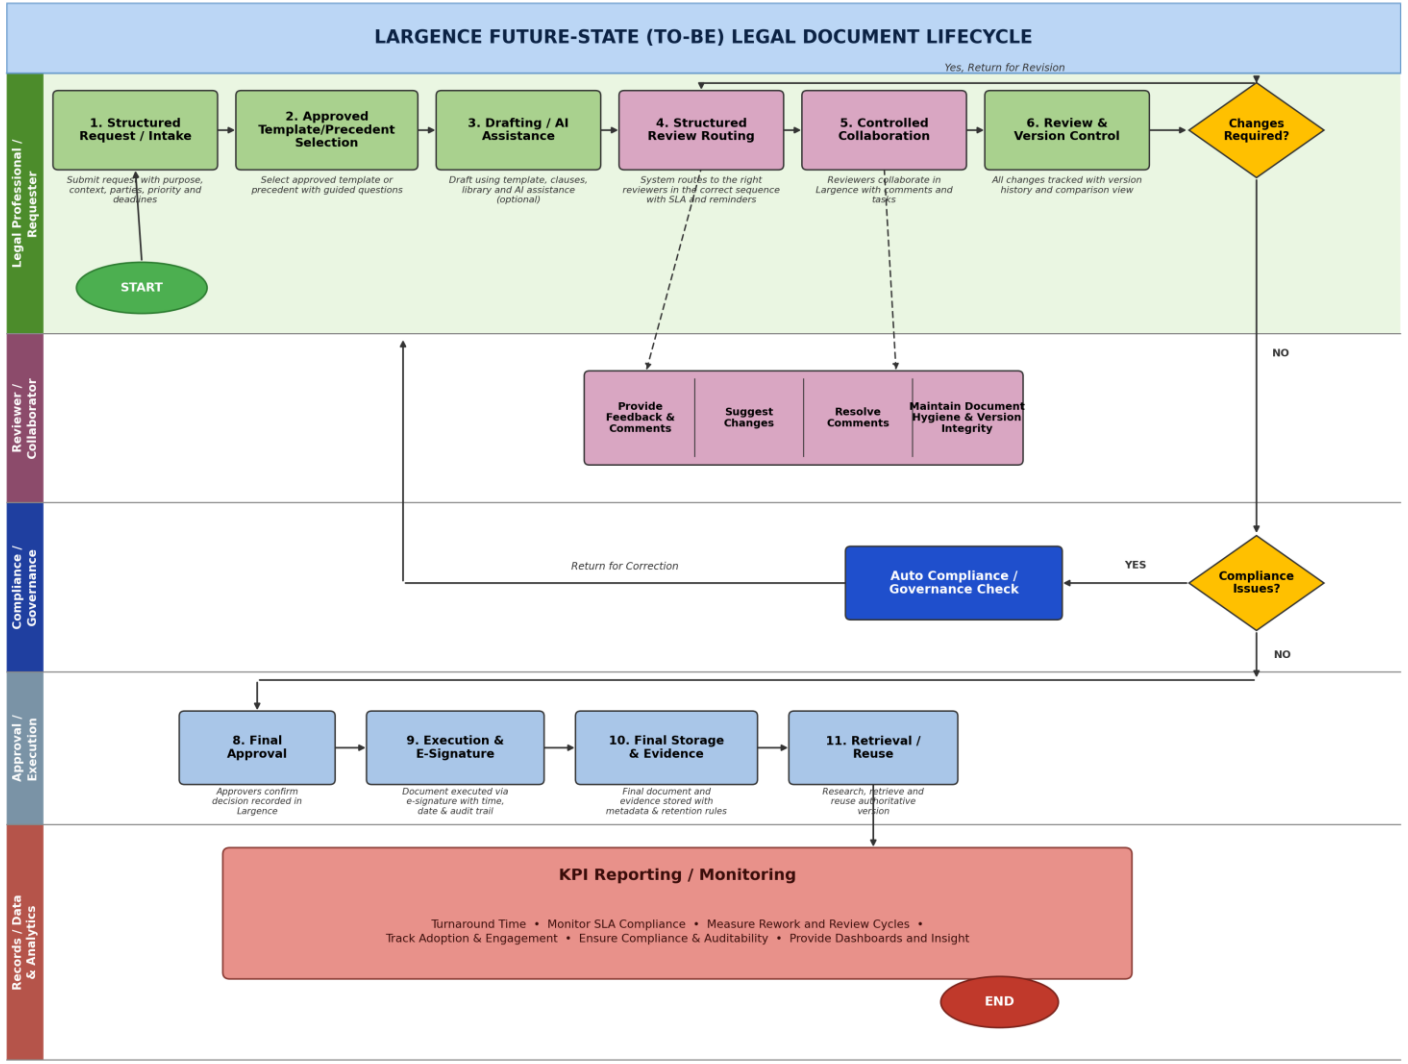

One Connected, Governed Lifecycle

Core Controls at Every Stage

Clear ownership • Authoritative version • Automated routing and reminders • Audit trail • Human legal accountability • Measurable workflow events

Detailed Swimlane: Roles, Steps & Controls

PRIORITY RECOMMENDATIONS

Top Immediate & Near-Term Actions

R1

Immediate

Authoritative-version & status model

Fixes version confusion and rework.

Benchmark: iManage

R2

Immediate

Link approval & compliance evidence to exact version

Strengthens auditability.

Benchmark: OpenText Legal

R3

Immediate

Define workflow ownership & escalation rules

Ends manual follow-up.

Benchmark: Legora

R4

Immediate

Reduce avoidable off-platform handoffs

Closes visibility gaps.

Benchmark: Juro

R6

Immediate

Formalise responsible-AI controls

Addresses AI trust & governance risk.

Benchmark: CoCounsel Legal

R11

Near Term

Structured final-record / evidence model

Secures retrieval & continuity.

Benchmark: NetDocuments

Benchmarks are used only as supporting reference for gaps already validated in Largence's own analysis — not as a substitute for stakeholder requirements.

PERFORMANCE MEASUREMENT

KPI & Performance Framework

No unsupported baseline values are inserted. The first step for each KPI is to confirm the data source, owner and current baseline.

End-to-End Turnaround

Median duration, request to execution.

Stage Waiting Time

Time waiting at review / compliance / approval.

Review / Approval Cycles

Count of cycles before completion.

Rework / Version Incidents

Avoidable rework due to version issues.

Platform-Contained Workflow

Share fully completed inside Largence.

Advanced Feature Adoption

AI / automation / reporting usage by eligible users.

Compliance Delay Rate

Workflows delayed by compliance review.

Approval Evidence Completeness

Final records with complete evidence.

Final Document Retrieval Time

Median time to locate the correct record.

PERFORMANCE MEASUREMENT

Business Success Criteria (6-Month Review)

Targets to be reviewed six months after go-live, once KPI baselines in Section 11 have been confirmed.

KPI	Target
Document Turnaround Time	-30%
Rework / Revision Cycles per Document	-25%
Workflow Visibility Metric	+50%
Platform Feature Adoption Rate	+20%
Customer Satisfaction (CSAT)	Measurable improvement
% of Work Completed Entirely Within Largence	Directional increase, tracked quarterly

COMPLIANCE & GOVERNANCE

Governance & Responsible AI Controls

1

Document Control

Authoritative version, status model, external-edit reconciliation.

2

Approval Governance

Defined authority, decision record, exact-version linkage.

3

Audit Trail

Creation, review, compliance, approval and execution evidence.

4

Evidence & Retention

Final documents linked to required supporting evidence.

5

External Access

Least-necessary access; controlled handoff and re-entry.

6

Responsible AI

Permitted-use rules, qualified human review, traceability, escalation.

IMPROVEMENT ROADMAP

Phased Implementation Over 12 Months

1

0-30 Days

Validate & Control

Confirm owners, approval authorities, authoritative-version rule, KPI definitions. Identify quick wins.

2

1-3 Months

Embed Workflow

Standardise governed workflow, statuses, routing, reminders. Begin KPI reporting.

3

3-6 Months

Integrate & Improve

Address priority integrations, template governance, controlled collaboration.

4

6-12 Months

Optimise & Scale

Use performance data to refine processes and expand successful practices.

OPEN ITEMS

Risks, Dependencies & Validation Gaps

Key Risks

- Stakeholder validation delay keeps requirements provisional.
- Limited baseline data prevents reliable benefit quantification.
- User resistance / habit — reverting to Word, email or shared folders.
- Over-automation could weaken legal accountability.
- Benchmark overreach — treating competitor features as requirements.

Outstanding Validation & Data Gaps

- Baseline end-to-end turnaround & stage-level durations.
- Frequency/impact of version-related incidents or rework.
- Official approval authorities by document type and risk level.
- Required AI traceability level by use case.
- Retention requirements for documents and audit records.

NEXT STEP

Decisions Required From This Presentation

1. Confirm priority recommendations (R1-R6) and assign accountable owners.
2. Approve the workflow-ownership and authoritative-version model.
3. Commit to KPI baseline collection before setting numeric targets.
4. Approve responsible-AI control rules for permitted / restricted activities.
5. Agree the 0-30 day validation actions and next implementation step.

Thank you — Largence LegalTech Business Analysis Team

Thank You!
